QUATRO

Subsoiler SIRIUS + fast harrow

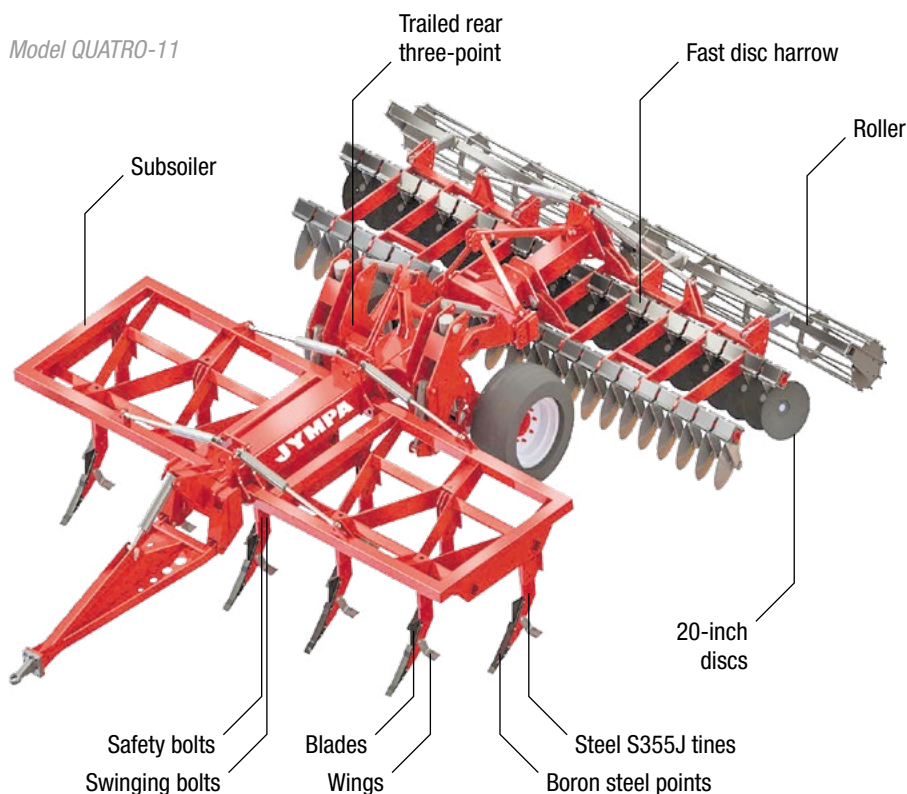

The **QUATRO** combined equipment is the natural evolution of the TANDEM machine, adapted to work quickly on large farms and to make the most of the power of large tractors.

It combines a SIRIUS subsoiler (with mechanical tines) or POLARIS (with hydraulic tines) with a fast harrow and a roller, which can work separately or together to make maximum use of tractor power while reducing working time, optimizing fuel consumption and leaving the soil well prepared.

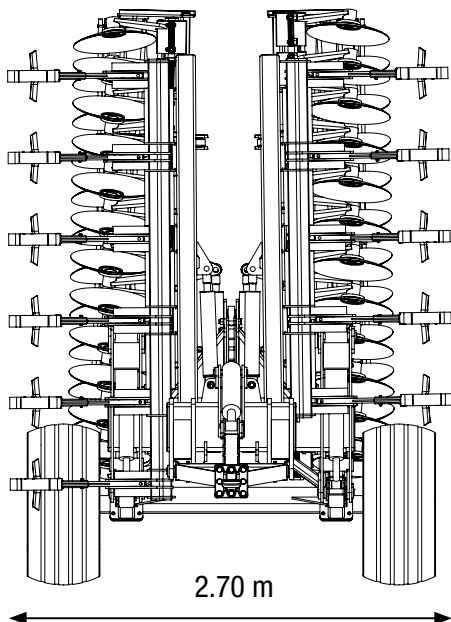

**“Maximum return
on your investment”**

Model QUATRO-11

Optional:
models with
hydraulic non-stop
safety system

Optional elements:

- K80 hitch
- Levelling wheels
- Lightning kit
- V20 reflective plates

Model	Required power HP	Folding	Distribution folded frame	Machine width m	Transport width m	Working depth cm	Clearance cm	No. tines	Tines section mm	No. discs	Hitch category	Approximate weight kg
QUATRO-9	250-350	Central hydr.	4+5	4.60	2.70	30-55	86	9	30 x 160	38	Ring hitch	6,300
QUATRO-11	350-450	Central hydr.	5+6	5.60	2.70	30-55	86	11	30 x 160	46	Ring hitch	6,900
QUATRO-13	450-600	Central hydr.	6+7	6.60	2.70	30-55	86	13	30 x 160	54	Ring hitch	7,500

— Models with hydraulic folding. When folded, their total width is less than or equal to 3.05 m.
