ALMENARA

Fast disc harrow

ALMENARA fast disc harrows are suitable for professionals who need intensive, fast and optimal work on land with large quantities of stubble and organic matter or for levelling the soil after ploughing, at speeds of up to 12 km/h.

They feature a lightweight and robust construction, with Ø 510 mm discs providing 40-120 kg of force per disc, and a cage, breaker or angle roller with manual or hydraulic adjustment. The disc arms are made of 10 mm thick steel and cushioned by elastomers, making them easy to maintain.

“For professionals”

Roller options

Ø 510 and Ø 560 mm
cage roller

Ø 460 mm
breaker roller

Ø 610 mm
angled roller

Model ALMENARA-3024
with breaker roller with
manual adjustment
