

Vineyards and orchards

ECOTER

Vegetal ground cover roller

The **ECOTER** roller is an alternative to traditional grass cutting, mulching or mulching for organic farming.

The blades press, bend and fold the stems of the mulch between the vines or trees, creating a blanket of organic matter that enriches the soil with nutrients, promotes good composting and protects it from weed growing. This mulch is kept alive and resprouts providing another layer of organic matter.

“For organic crops”

Model	Machine width m	Working width m	No. blades	Ø rollers mm	Approx. weight empty / full kg
ECOTER-1000	1.09	1.00	20	475	215 / 300
ECOTER-1200	1.29	1.20	20	475	260 / 360
ECOTER-1500	1.59	1.50	20	475	325 / 450
ECOTER-1600	1.69	1.60	20	475	350 / 475
ECOTER-1800	1.89	1.80	20	475	390 / 540
