MINTAKA

Soil loosener

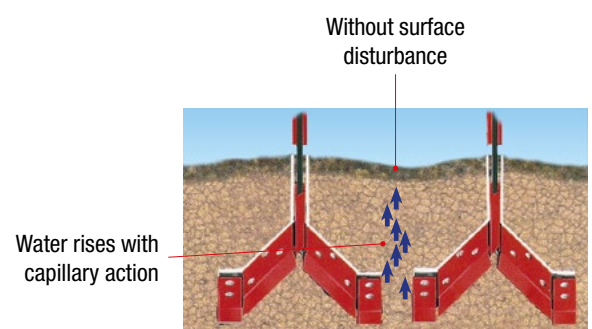

MINTAKA soil looseners have been specially developed to loosen, aerate and decompact the soil in depth, maintaining the vegetation cover and without altering the surface. This makes them suitable for pasture areas or direct seeding crops, among others.

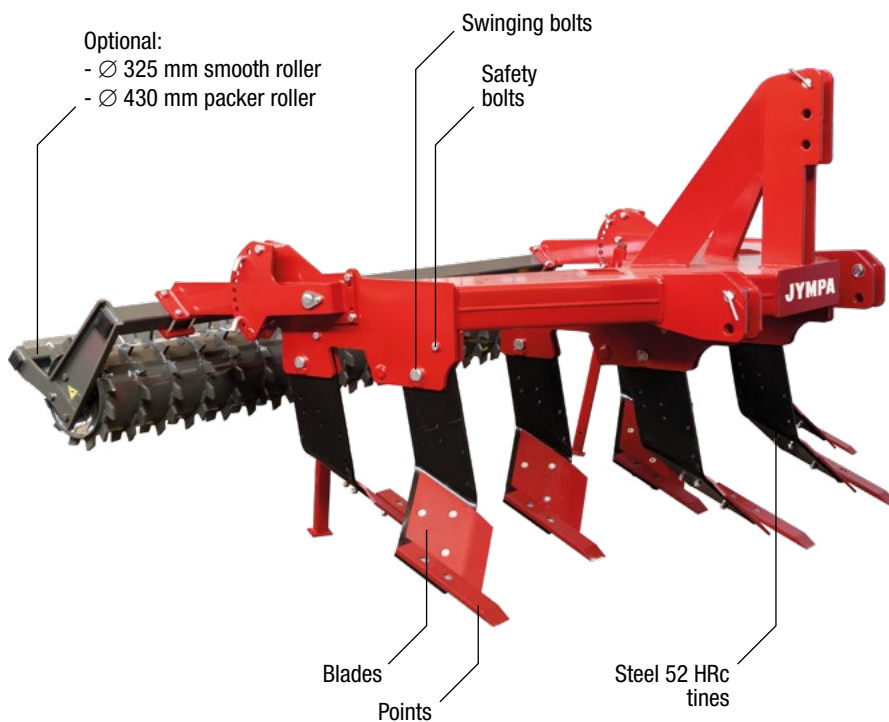

The exclusive design of the tines manufactured with high strength steel makes them very resistant and the soil is easily penetrated. Mechanical fuses protect the soil loosener and the tractor in case of possible snagging.

“Minimum alteration of the surface”

Model MINTAKA-3 with tine protectors

Model MINTAKA-4 with Ø 430 mm packer roller

Roller options

Ø 325 mm smooth roller

Ø 430 mm packer roller

Optional elements:

- Tines with protectors
- Tines with wings
- Lightning kit
- V20 reflective plates
